**Re: Second Periodic Review of the Commission's Rules and Policies  
Affecting the Conversion to Digital Television MB Docket No. 03-15  
and Third Periodic Review MB Docket 07-91**

Dear Ms. Dortch:

Pursuant to Section 1.1206(a)(2) of the Commission's Rules, this is to report that an *ex parte* oral presentation and demonstration was made on August 8, 2007, concerning matters at issue in the above referenced proceeding.

The presentation and demonstration was made by undersigned counsel, Professor Tim Collings, consultant, Murray Eldon and Leonard Wan of Wi-LAN V-chip Corp. (formerly Tri-Vision Electronics Inc.) to members of the FCC Media Bureau including Eloise Gore, Sarah Mahmood, John Wong, John Gabrysch, John Kiefer, Mike Lance, Evan Baranoff, Wayne T. McKee, members of the OET including Julius Knapp, Alan Stillwell and Stephen Martin, Neal McNeil of the FCC Enforcement Bureau, Rick Chessen from Commissioner Copps' Office. Anita L. Wallgren, Program Director of DTV Converter Coupons and Art Wall Technical Advisor from the National Telecommunications and Information Administration.

The Company exhibited its test system for showing whether digital receivers are capable of meeting the FCC requirement to respond to any future content advisory system. The testing showed certain digital televisions and digital video recorders failed to respond to a new content advisory system. An example of a digital video recorder that does not have capability of blocking programming under the MPAA or TV Guidelines rating systems (or allowing a V-chip equipped analog TV to perform this function) was demonstrated. The Company's test results for other digital receivers it has tested to date were discussed.

Ms. Marlene H. Dortch

Page 2

Other points covered included information on the recent merger of Wi-LAN and Tri-Vision, as well as reasons why manufacturers had not implemented the downloadable RRT feature.

In addition the group discussed the understanding that all digital television receivers and tuners, including those without associated display, such as set-top boxes designed for the NTIA DTV Coupon program, are required by regulation set out in FCC Report and Order 04-192 to have the ability to respond to both the existing content advisory system as well as any future content advisory system that might be transmitted.

In accordance with Sections 1.49 (f) and 1.1206(b) of the Commission's Rules, this letter is being filed electronically in the above dockets.

Very Truly Yours,

A handwritten signature in black ink, appearing to read "Michael P. Fortkort", written in a cursive style.

Michael P. Fortkort
